This presentation is made based on (more than) 3000 patient's experience.

The pain treatment with ozone is an excellent one. So ... why don't we have 100% results?

1.- WRONG DIAGNOSIS:

- A. Treatment of an irradiate pain like a local one: every pain in
 - Upper limb (with no evident cause): must be treated like an irradiate cervical problem, and treated in cervical region.
 - Lower limb (with no evident cause): must be treated like an irradiate lumbar problem and treated in lumbar region.
- B. Traumatical or surgical scars in cervical or abdominal region can explain cervical or lombar pain. The treatment must begin with subcutaneous ozone injections in the pericicatricial region.
- C. Pain given by chronic fatigue syndrome
 - Treatment in diseases when the ozone treatment is inefficient (lumbar stenosis, wryneck ...)

2.- TECHNICAL ERRORS:

- A. Position of the needle (paravertebral)
- B. Wrong concentration of ozone
